

BANK IOWA BIRD JACK-O-LANTERN

- Step 1.** After you have scooped out the pumpkin's interior contents, firmly tape the template onto the outside center (see a placement example in the upper left-hand corner).
- Step 2.** Carefully carve along the dark blue dotted line, or around "Hole 1." Remove the pumpkin piece from Hole 1 when completed.
- Step 3.** Carefully carve along the light blue dotted line or around "Hole 2." Be careful to not carve where there are red X's. This section helps to connect the bird's wings to the rest of the pumpkin. Remove the pumpkin piece from Hole 2 when completed.
- Step 4.** Illuminate your masterpiece with a battery operated tealight, and display your spooky Bank Iowa pumpkin in a place of great honor.
